HOIST® TAKES FIBO BY STORM!

Even with the continuing economic crisis and the volcanic ash, HOIST filled the booth with dealers and customers interested in being ROC'D. HOIST products launched at the tradeshow included the RPL-5405 Standing Calf and the new Commercial Multi Jungle System (CMJ). Again a special thanks to Sport-Tiedje for their time and preparation to ensure a successful tradeshow. We would also like to thank our other distributors for taking the opportunity to work the booth to close deals. Based on the turnout and continued expansion of the show floor this years proved that despite the overall economic situation, people all over the world are still concerned about their health and fitness.

Sport-Tiedje also took advantage of incorporating our new Commercial Strength Products DVD with German subtitles into the booth layout.
